

Access and use of the Virtual Desktop – PHD and Internal Professors

To use the research programs we have created a Virtuallabs platform, with restricted access to authorized staff. The use of this platform is the same as the virtual desktop that we've been using up to now, the only difference is the software that is installed.

Platform Access

Internal professors can gain access with their user and password of their **personnel account** in the “**domain ie.es**”. The PHD students can log in with their student data in the domain “**alumno.ie.es**”.

We can view the following desktop options:

We have to choose the option “Research Software”. The system will request us security confirmation.

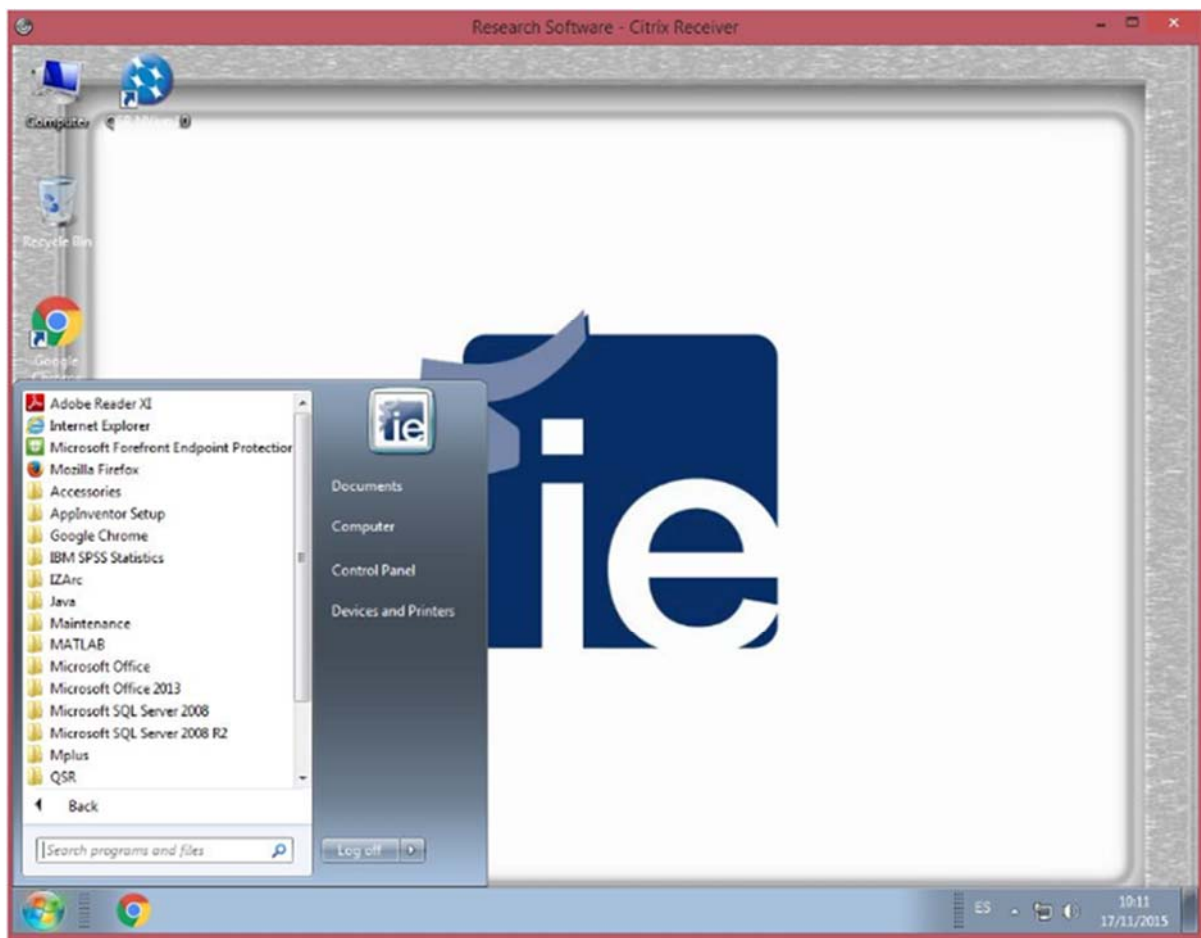

IT Department

Access and use of the Virtual Desktop – PHD and Internal Professors

The environment and operation of the virtual desktop

We can find these specialized programs for this type of profile as direct access in “Start” – “Programs”.

Through this platform we can access the following software for research use:

- SPSS
- MATLAB
- MPLUS
- NVIVO
- STATA

And access generic software as well:

- NAVEGADORES INTERNET
- OFFICE
- ADOBE READER
- COMPRESOR DE FICHEROS
