Connect your Android to the IE's WIFI

To connect to the wireless network with Android, Please follow these steps:

1. Now check that it is properly connected to the WIFI network, called: "Alumnos":

2. Once connected, you access the device's "Browser" and a security screen appears, ignores and click on the option to "continue" that appears in the validation window, where you enter your student user name and password:

3.– With the browser open, click on the device's "menu" button and select the options "more" – "adjustments":
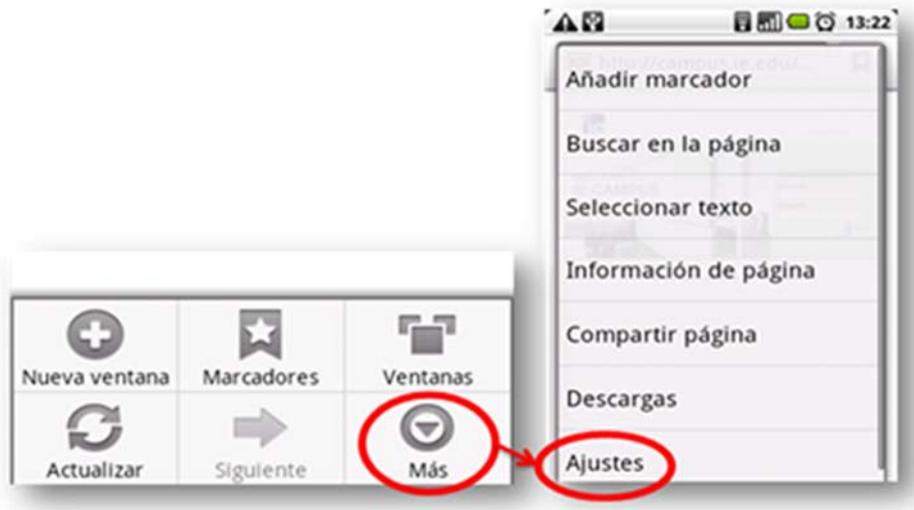

4. – The screen that appears next should be set up as follows:
