

IT Department

Print from a Windows systems

First, you need to connect your laptop to the Wi-Fi network, "Alumnos" If you have any problem to connect it <u>click here</u>.

1. Click Start button + "R"

٨	Escriba el nombre del programa, o recurso de Internet que desea abri	carpeta, documento o ir con Windows.
<u>Abrin</u>	\\xepr00	~

- If your classes are going to be MM31 and MM31bis, type <u>\\xepr004.ie.es</u>
- If your classes are in the rest of the buildings type<u>\\xepr002.ie.es</u>

2. It will ask us to identify ourselves with: "Alumnos\username" and Password of the domain. Remember mark the option "remember my credentials".

_	alumnos\amata.exmbaq2012
-	
	Domain: alumnos X Remember my credentials
	Insert a smart card

3. You must enter this data correctly otherwise it will produce an error.

4. Now you have to find the printer "Student_MFP" and connecting with the option "connect" like this picture

ganize Network and Sharing Center	er View remote printers	
Favorites	7 7	
Desktop		
Downloads		
	Open	
Libraries Student_M	Connect	Users
Documents	Create shortcut	
👌 Music	Description	
Pictures	Properties	
Videos Videos		

5. The appropriate drivers are installed, and then you can print.
