First, you need to connect your laptop to the Wi-Fi network, "Alumnos".

1. Click Start button-> All programs -> accesories -> Run, and you must type the print server name (\Xepr02.ie.es) into the following screen:

2. It will ask us to identify ourselves with: Alumnos\username and Password like this windows. Remember mark the option “remember my credentials”.
3. You must enter this data correctly otherwise it will produce an error.

4. If we have entered correctly our data, the printer will be set up on our computer and also if we have installed the appropriate drivers.
