

STRATEGY & OPERATIONS / BUSINESS ANALYST

Strategy and operations roles in the tech sector are perfect for students who enjoy solving complex problems, improving internal processes and helping innovative companies scale effectively. These roles offer a unique opportunity to understand how tech businesses grow, adapt and stay competitive in fast-paced environments.

Common entry-level job titles in this area can include **Business Analyst**, **Operations Analyst** or **Strategy Consultant**. In these kinds of roles, you'll most likely work on cross-functional projects, analyze performance data and support decision-making across teams like product, sales and customer success.

Here is a list of some of the Top Companies and their Careers Websites in which you can find opportunities by country or by role. Use Keywords such as "*Strategy*", "*Operations*" or "*Business Analyst*":
